

METAL COLOUR SELECTOR

a designer chart of Hadrian UK's standard and "special effects" colours

Overhead braced systems are a popular choice for old and new buildings. Our floor mounted overhead braced partitions are especially suitable for heavy use areas such as schools, colleges, institutions and commercial/industrial installations. While modern in design, these units require no special structural provisions to effect a rigid installation and can be erected on any type of floor.

The Elite series ensures privacy using continuous stop and hinge sight line fillers along with a minimal 150mm gap from the floor to the underside of the door and panels.

The Hadrian UK Elite range of overhead braced toilet partitions and duct access panels is available from our central warehouse within 7-10 working days - powder coated to match your colour choice.

Additional to the 12 standard colours shown on this sheet we offer a comprehensive choice of over 200 RAL colours to match just about any designer colour scheme.

Why choose powder coated?

- 100% fire proof
- Fast delivery
- Easy, cost effective installation
- Secure, concealed hardware
- Excellent recycled content
- Lower unit price
- Large selection of designer colours
- Durable and repairable material

Lightning Fast Submittal Package

Just send us your sketch or an outline description of the space you need to fill and we will provide you with the following information by return

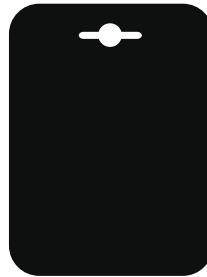

- Layout drawings
- Material specifications
- Maintenance procedures
- Elevation drawings
- Warranty information
- Price and delivery schedule

Unlike some manufacturers, for custom colours (i.e. any alternative RAL colour) we make no additional charge.

Important Note

Hadrian UK has taken great care to ensure that these colour swatches are the closest possible representations of our available finishes. Due to print limitations, colours, textures and gloss levels may vary. For the most accurate colour samples please request a powder coated colour chip.

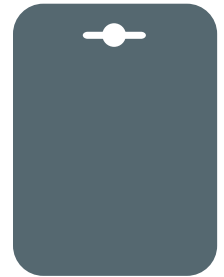

We also stock Elite overhead braced type 304, #4 brushed stainless steel
