

Hybrid Stainless Steel - Floor to Ceiling ELITE PLUS SERIES Metal Toilet Partitions

Material Specification

1.01 Construction

Doors, Panels and Pilasters shall be constructed of one sheet of panel flatness type 304, #4 brushed finish stainless steel and one sheet of panel flatness type 304, Embossed stainless steel with 5WL® pattern, laminated under pressure to a "verticel" honeycomb core for impact resistance, rigidity and sound deadening. Honeycomb to be of virgin, long fiber paper with a maximum 13mm (0.5") cell size. Formed edges to be welded together and interlocked, under tension, with a roll-formed oval crown stainless steel locking bar, mitred, welded and ground smooth at the corners.

1.02 Doors

Shall be 1829mm (72") high and 25mm (1") thick with cover sheets not less than 0.8mm (.030"). Exterior side shall be type 304, #4 brushed stainless steel. Interior side shall be type 304, Embossed stainless steel.

1.03 Panels

Shall be 1829mm (72") high and 25mm (1") thick with cover sheets not less than 0.8mm (.030"). Exterior side shall be type 304, #4 brushed stainless steel. Interior side shall be type 304, Embossed stainless steel.

1.04 Pilasters

Shall be 32mm (1.25") thick with cover sheets not less than 1.2mm (.048"). Exterior side shall be type 304, #4 brushed stainless steel. Interior side shall be type 304, Embossed stainless steel.

1.05 Pilaster Fastening Method

AT FLOOR: Pilasters shall be securely and rigidly fastened to the floor and fitted with a jack levelling screw for vertical adjustment. The floor fastening shall be concealed and protected by a 102mm (4") high, die-formed stainless steel pilaster shoe.

AT CEILING: Pilasters shall be rigidly fastened to structural steel or pre-cast concrete supporting member (Note: wood support is not acceptable) by means of two heavy hanging studs permitting vertical adjustment between bottom of supporting member and finished ceiling line. Hadrian supplied ceiling studs MUST be used to create a secure installation. The top connection shall be concealed by a 102mm (4") high, die-formed stainless steel pilaster shoe. NOTE: The specification does not include the supplying, installing, drilling or tapping of any of the structural members required in the ceiling for the support of these units. Only the studs are supplied for installation by others.

1.06 Hardware & Fittings

All panel-to-wall, panel-to-pilaster and pilaster-to-wall connections shall be made with full height channels. Door hardware shall be chrome plated zinc die castings, standard. Fasteners are 12 x 1-3/4" and 12 x 5/8". Doors shall be equipped with gravity type hinges mounted on upper and lower pilaster hinge brackets. Door hinges shall be wrap-around style and adjustable to permit the door to come to rest at any position when not latched. Threaded upper hinge pin shall have a metal core and self lubricating nylon sleeve to ensure smooth, quiet operation. Each door to be fitted with a combined coat hook and bumper and a concealed latch, with face mortised flush with edge strip of door. A full length continuous stop and hinge side filler eliminate all sightline gaps between pilasters and doors.

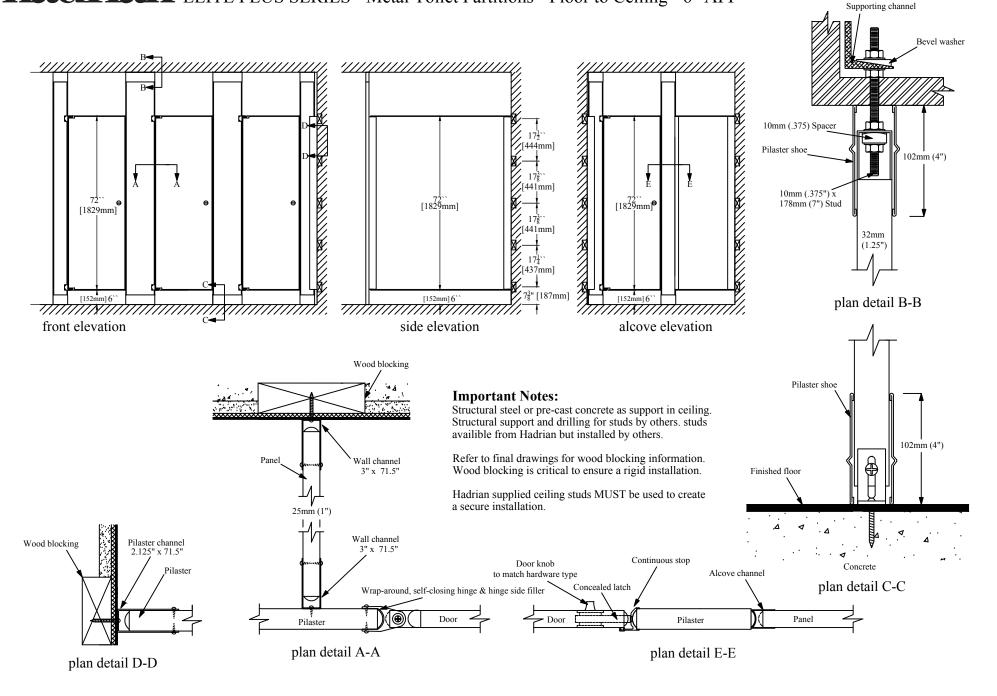

1.07 Finish

Type 304, #4 brushed finish on exterior of units. Type 304, Embossed stainless steel with 5WL® pattern on interior of units.
